

Waiting For The Other Shoe …..

James: lyrics.
James: guitars, bass, vocals.
Nigel: drums, Hammond B3.

Put up with a lot of stuff
Gone on for the longest time
Been through things that have felt rough
Like living in a pantomime

It was only happening on one side
The other side was looking cool
Until it all kicked off over there
Made me feel just like a fool

And then things all went quiet
Everything seemed to stop
Now we're just a'sitting here
Waiting for the other shoe to drop!

You may not know what I'm talking about
Cos it's to do with my real life
And all the folks that's been doggin me
Giving trouble and giving strife.

When things happen you can't escape
You need to find out where they head
So you know what outcome to expect
You really don't wanna be misled

So, when things go all quiet
And everything seems to stop
You find yourself just sitting here
Waiting for the other shoe to drop!

I know that things are gonna change
I know it won't be good
I know it's gonna mess things up
And kill the neighbourhood
I know all this I know it well
Better than anyone
I just don't know why things have stalled
Please just get the darn thing done

So, when things go all quiet
And everything seems to stop
You find yourself just sitting here
Waiting for the other shoe to drop!
